**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1. A consumable film containing nitroglycerin, water soluble polymer.
2. A consumable film containing nitroglycerin, water soluble polymer and a therapeutic agent.
3. A consumable film containing a therapeutic agent and a water soluble polymer.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1611

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

1. A consumable film containing nitroglycerin, water soluble polymer (claims 1-17).
2. A consumable film containing nitroglycerin, water soluble polymer and a therapeutic agent (claims 18-55).
3. A consumable film containing a therapeutic agent and a water soluble polymer (claims 56-104).

The following claim(s) are generic: 1, 9 and 56. Examiner notes that though claims 64, 70 and 73 are independent claims, however, they are of the similar scope as claim 56.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: An edible film with nitroglycerin does not anticipate or render obvious an edible film that requires a different therapeutic agent such as anti-malarial agent or proton pump inhibitors. An edible film with a single therapeutic agent does not anticipate or render obvious an edible agent with a combination of nitroglycerine and another therapeutic agent. Further, an edible film with a drug does not anticipate an edible film containing nitroglycerine or a combination of nitroglycerine and another therapeutic agent.

4. If applicants choose to elect species 2 or 3, then they are further required to elect a single class of therapeutic agent from those listed in claim 19 (for species 2) or from claims 56(for species 3). It is to be noted that the same class of therapeutic agent will be examined in each of the independent claims 56, 64, 70 and 73.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1611

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
